

## 2018 National Curriculum Assessment KS2 Writing Analysis Tool

### Release Notes

It is strongly recommended that you use this tool in conjunction with the frameworks found here.

This is a new tool intended to help leaders, teachers, children and parents organise, inform and plan for future learning. Due to the complexity of the current assessment system (and if you are used to using the PrimaryTools Tests Analysis Tools), there are a few things to be aware of using this tool. Firstly, if you are confident a pupil has already met the Working Towards criteria (W/T), we recommend filling in the '1s' on the data input tab for Working Towards rather than leave them blank (not assessed), and likewise for those working at a Greater Depth (G/D). Most children will be working within and towards the Expected standard, and this tool focuses on them. Many of the tables and charts will only be based on the Expected Criteria (the headings will make this clear).

We cannot stress enough that this should be used in conjunction with the Frameworks. The criteria have been derived from them as closely as possible, but do not match exactly with them. Criteria starting with 'e.g.' are examples and not necessarily required to meet the expected standard, however this tool will treat those criteria as required. Use this as a tool to inform and **read the frameworks!**

**We hope you will like the enhanced Pupil Reports. There is a second page with a thorough break down of what a pupil needs to focus on. Send us an email if there is something you are not sure of, we would very much love your feedback too! [info@primarytools.co.uk](mailto:info@primarytools.co.uk).**

**You can register on the Mailing List, 'like' the Facebook page, follow on Twitter or Pinterest.**
