## Key stage 2 English reading

### Sample questions, mark schemes and commentary for 2016 assessments

#### Introduction to sample materials

The new national curriculum will be assessed for the first time in May 2016. This set of sample materials is being published to give teachers an indication of how the new curriculum will be assessed. The materials presented here primarily focus on new areas of the curriculum and how questions assessing those areas might appear.

The examples in this document have not been through the rigorous development process that live tests go through. We will decide on final question formats once we have data from trialling the test materials. This means that some of the question types may not appear in the live tests. We will publish complete sample tests in 2015 that will reflect our findings and will be indicative of the final live tests.

These materials have been reviewed by teachers and their comments have been taken into account.

As the questions have not been trialled in schools, the mark schemes do not consider the full range of acceptable responses or include example pupil responses. They only give a basic indication of the types of response that would be credited.

The questions in the English grammar, punctuation and spelling, mathematics and science tests will appear in order of difficulty, where possible. In English reading, the texts appear in order of difficulty. In these sample materials, the texts and questions are not necessarily in order of difficulty, nor do they reflect the range of question difficulties that will appear in the final tests.

Test frameworks that illustrate the test model, content domain and performance descriptors for the 2016 national curriculum tests are on GOV.UK at [www.gov.uk/sta](http://www.gov.uk/sta). Please note that these sample materials are not designed to match the frameworks in terms of ratios of question/item type or coverage. They do not form complete tests as described by the test frameworks and are, therefore, not sample tests.

We recommend that these materials are not used for assessment purposes.

## Key features of the English reading tests

The questions in the English reading tests will be linked to a specific area of the national curriculum. These areas are listed in the test frameworks.

Tests could include age-appropriate fiction, non-fiction and poetry from a variety of origins and traditions, covering, over time, a wide range of text types, forms and purposes. The final texts in the test booklets will be more demanding than current texts for both key stage 1 and key stage 2.

Questions written for the reading test will clearly depend on the texts that are selected. There is a focus on comprehension in the new national curriculum and there will therefore be a higher percentage of comprehension questions in the new assessments.

The key stage 2 test will contain three / four texts. The texts will become more difficult as you go through the paper; they won't be linked by a theme. The reading booklet will be separate from the answer booklet. The text and questions are presented together here, but they will be separate in the live test.

Vocabulary in context will be explicitly assessed. Pupils will need to identify or provide their own synonyms for specific words within the texts.

Pupils will need to demonstrate an understanding of texts by predicting what might happen next. Prediction questions will mainly be limited to fiction, or where information, plot or character development allows. Answers will need to be text based. Pupils will need to refer to key elements of plot, character or information. This document does not include sample prediction questions as the sample text does not lend itself to this question type.

There will be questions where pupils need to demonstrate an understanding of the differences between fact and opinion. These will mainly be associated with non-fiction texts.

Comparison is now an explicit area of the national curriculum. Pupils will need to compare information, characters or events within a text.

Summary is also a new expectation of the national curriculum. Summary questions will usually be closed questions. Pupils will need to order events from fiction or non-fiction texts, or select the most appropriate summary from a given list. Pupils' answers to open response summary questions will need to be securely rooted in the text.

### **Timings for the test**

The English reading paper will take an hour to administer. There will be no separate reading time.

# exploring National Parks

**Many countries all over the world have National Parks. There are about 7000 National Parks throughout the world. Most of them protect natural settings as well as the plants and animals that live there, but a few are in towns and cities.**

The United States of America created the very first one, Yellowstone National Park, in 1872. It is so big that it covers part of three states: Wyoming, Montana and Idaho. People go there to see the geysers (natural hot springs) and amazing rock formations. The most famous geyser, 'Old Faithful', erupts about 20 times a day.

The largest National Park in the world is in Northeast Greenland. The park is so vast that only 30 countries in the world are larger.

**Map showing the National Parks of the United Kingdom.**

## Are there National Parks in England?

There are nine National Parks in England. The first three were the Peak District, the Lake District and Dartmoor, which were all named as National Parks in 1951. Others followed soon afterwards: the North York Moors in 1952, the Yorkshire Dales and Exmoor in 1954 and in 1956 Northumberland. No new ones were added for nearly 50 years. The final two, the New Forest and the South Downs, were designated as National Parks in 2005 and 2010 respectively. The Norfolk Broads was given similar status to the parks in 1989, so it is generally included in information about them.

## Are National Parks in England the same as those in other countries?

Many National Parks around the world cover huge areas of land where nobody lives, but in England most of the countryside within them is used for farming and other activities. As a result, National Parks in England include places where people live and work, as well as wild and beautiful areas where there is little sign of human life.

The National Parks in England are often called 'England's Breathing Spaces' because they are places where people can go to be in the open air, away from the dirt and noise of cities and towns. They provide spectacular scenes of mountains, meadows, moorlands, woods and wetlands.

## Why go to the National Parks?

There are plenty of activities to do in all of the National Parks in England. Visitors can walk or cycle, following marked routes, and many of the parks put on activities for families.

In the Norfolk Broads there are boat trips on the environmentally friendly boat, *The Electric Eel*, and in Dartmoor and the Yorkshire Dales families can go 'geocaching', which is a sort of electronic treasure hunt using maps and satellite navigation devices. In the Lake District, there are 'treetop treks', where children from the age of 5 (and adults!) can clamber across rope bridges, cross wobbly logs and zoom down zip wires.

People who are interested in history can walk along sections of Hadrian's Wall in Northumberland National Park. In some places, people do not even have to go walking: the North Yorkshire Moors Railway has a steam train that takes tourists through all the moorland scenery towards the seaside at Whitby.

## Are there any problems in the National Parks?

There are about 110 million visitors to the parks every year, bringing many benefits to the areas but creating problems too. National Park authorities have to encourage this tourism so that they can afford to conserve the parks and improve them. However, while conservation is made possible and some businesses flourish from the extra customers, many popular towns, villages and beauty spots can be swamped by

visitors. This results in overcrowded car parks and roads choked with traffic. Life can be difficult for people who live there, as gift shops and cafes take over from everyday shops; in popular areas, house prices can become too expensive for local people making it hard for them to stay in the area.

In the rural parts of the parks, too many people walking, cycling or horse riding on the same tracks can result in erosion. Paths can be strengthened, but then they look less natural. Sometimes walkers try to avoid the main paths to lessen the damage, but that can create more of a problem if they trample down grass which provides winter food for animals, or if they climb over fences and dry stone walls and break them down. This also disturbs wildlife and farm animals, especially when sheep are about to have lambs or birds are nesting.

Another major problem, which is not confined to the National Parks, is litter. In the parks it is a particular danger to animals. Broken glass can also cause fires by focusing the rays of the sun. When these start in wild places, they are much harder to control and can damage large areas very quickly, posing a threat to wildlife, people and small villages.

## How can people help?

All National Parks in England promote the Countryside Code, which tells people how to take care of their environment. In America they run a similar scheme: Leave No Trace. If these rules are followed, the National Parks will be preserved and continue to give pleasure to many people for a very long time.

## Sample text and questions for key stage 2 booklet 1

### National Parks (non-fiction prose)

This is an example of a non-fiction text at key stage 2. In a final test booklet it would appear as the middle text.

For open response questions, where there is one acceptable point, it is given next to a square bullet point. Where there is more than one acceptable point, these are listed and numbered (eg: AP1, AP2 etc). Round bullet points followed by italicised responses demonstrate example responses that pupils may give.
